The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ISIN: LU1331155447
The fund is managed by Söderberg & Partners Asset Management S.A.

Proaktiv 75 PM

Proaktiv 75 PM, share class C, a sub-fund of Amrego I SICAV

Objectives and Investment Policy

The sub-fund is actively managed and does not track an index. The objective is to maximise the long-term return with the risk level of the sub-fund taken into account.

The sub-fund invests in other funds, both daily traded funds and Exchange Traded Funds (ETFs). The share of capital invested in equity funds and fixed income funds will change over time according to a specific risk control model.

This model aims to preserve at least 75% of the maximum share price over one year. The sub-fund will invest globally to maintain a diversification over different regions and sectors.

No more than 20% of the capital of the sub-fund may be invested in one single fund.

The sub-fund can also use derivatives, complex investment instruments, such as but not limited to, futures, options and swap contracts, to achieve the sub-fund's investment objective or to mitigate risks.

Any dividend income will be reinvested in the sub-fund.

The Net Asset Value per Share is calculated on each day qualified as a full bank business day in Luxembourg, except 24 and 31 December. Purchase and sale of shares may normally be made every day that the Net Asset Value per Share is calculated.

Recommendation: This sub-fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risks and Rewards

What does this synthetic risk and reward indicator mean?

- The shares of the sub-fund are classified in category 5 because the value of the share may be subject to high variations and consequently the risk of loss and the opportunity of gain may be high.
- The risk category for this sub-fund was calculated using simulated historical data. The risk category may not be a reliable indicator of the sub-fund's future risk profile. The risk category shown is not guaranteed and may change over time.
- The seven-category scale is complex, for example 2 is not twice as risky as 1. The gap between 1 and 2 might not be the same as the gap between 5 and 6. A category 1 sub-fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited.

Which materially relevant risks are not adequately captured by the synthetic risk and reward indicator?

- Liquidity risk: low liquidity might result in that it would be difficult or impossible to buy or sell an investment instrument in a timely manner and that the price could be lower or higher than expected.
- Counterparty risk: the risk that a counterpart does not fulfill its obligations to the sub-fund (e.g. not paying an agreed amount or not delivering securities as agreed).
- Currency risk: the sub-fund may hold some of its investments in currencies other than the sub-fund's reference currency. Thus the value of the sub-fund may rise and fall due to currency movements.
- Operational risk: the risk of loss resulting from e.g. system breakdowns, human errors or from external events.

How can I get more information about the risks of the sub-fund?

Additional information concerning the risks of investment is indicated in the corresponding sections of the prospectus of the fund.
